MOSSAICA

Cam mozaikler, yapı sektöründe dekoratif ve fonksiyonel özellikleriyle dikkat çeken, modern ve estetik bir malzemedir. Özellikle son yıllarda iç ve dış mekân dekorasyonlarında öne çıkan cam mozaikler, göz alıcı parlaklıkları ve çeşitlilikleriyle mekânlara sanatsal bir hava katmaktadır.

Renk yelpazesi oldukça geniş olan bu mozaikler, her tarza uygun desen seçenekleriyle sınırsız bir tasarım esnekliği sunar. Kırmızı, mavi, yeşil, altın sarısı, gümüş gibi birçok farklı renkte üretilen cam mozaikler, tek renk veya çok renkli olarak kullanılabilmekte, böylece klasik ve modern dekorasyonlarla uyum sağlayabilmektedir.

Cam mozaiklerin en öne çıkan özelliklerinden biri, doğal ışıltısı sayesinde bulunduğu alanda dinamik ve parlak bir atmosfer yaratmasıdır. Işığı yansıtma özellikleriyle mekânda derinlik hissi oluşturur ve estetik bir vurgu kazandırır.

Bu mozaiklerin yüzeyinde bulunan saydamlık, ışığın açısına göre farklı tonların ortaya çıkmasına olanak tanır.

Bu özellikleri sayesinde cam mozaikler sadece evlerde değil, restoran, otel, spa ve lobi gibi ticari alanlarda da tercih edilir. Kullanım alanları oldukça geniş olan cam mozaikler, özellikle nemli ve suya maruz kalan ortamlarda tercih edilir.

Bu nedenle banyolar, mutfaklar, balkonlar gibi alanlarda dayanıklılığı ve estetik yapısıyla ön plana çıkar.

En yaygın olarak kullanıldığı yerlerden biri ise yüzme havuzlarıdır. Havuzlarda mozaik kaplama, suya dayanıklı yapısıyla uzun ömürlü bir kullanım sunarken, canlı renkleri sayesinde suyun berraklığını ve derinliğini vurgular.

Mozaiklerin parlak yapısı, suyun doğal ışıltısıyla birleşerek görsel olarak eşsiz bir ambiyans oluşturur. Ayrıca, havuzların hijyenik ve kolay temizlenebilir olması, cam mozaiklerin havuzlarda tercih edilmesinin bir başka önemli sebebidir.

Cam mozaikler, dayanıklı yapıları sayesinde yıllarca kullanılabilen, bakım gerektirmeyen, hijyenik bir yapı malzemesidir. Yüzeyleri kolayca temizlenebilir ve kir, su, nem gibi dış etkenlere karşı direnç gösterir. Özellikle havuzlarda, suyun sürekli temas ettiği yüzeylerde dayanıklılıkları ve temizlenme kolaylıkları sayesinde uzun süre sorunsuz bir kullanım sağlarlar.

Mozaiklerin yüzeyi, kireç veya yosun gibi oluşumlara karşı dayanıklı olduğundan, havuzların bakım ve temizliği de kolaylaşır. Ayrıca, çevre dostu bir yapı malzemesi olan cam mozaikler, geri dönüştürülebilir özellikleriyle sürdürülebilirlik açısından da avantajlıdır. Mozaikler, hem modern hem de klasik dekorasyon stilleriyle uyum sağlayabilen şık bir yapı malzemesi olarak yaşam alanlarına hem görsel zenginlik hem de uzun ömürlü bir çözüm sunar.

Glass mosaics are a decorative and functional material in the construction industry, gaining popularity in modern and aesthetically-driven designs. In recent years, they have become a top choice for both indoor and outdoor spaces due to their vibrant colors and diverse patterns, adding an artistic touch to any environment. With an extensive color palette, glass mosaics offer nearly limitless design flexibility, with options ranging from red, blue, green, and golden hues to silver tones. They can be used in single or multi-color patterns, making them compatible with both classic and contemporary styles.

One of the most striking aspects of glass mosaics is their natural radiance, which creates a dynamic and luminous atmosphere wherever they are applied. Their ability to reflect light enhances the depth and visual appeal of a space. Thanks to their transparency, they reveal different tones depending on the angle of the light, making them a captivating focal point. Because of these qualities, glass mosaics are widely used not only in residential spaces but also in commercial venues like restaurants, hotels, spas, and lobbies.

Glass mosaics are especially popular in environments exposed to moisture and water, making them ideal for bathrooms, kitchens, balconies, and other similar areas where their durability and aesthetic appeal shine. They are particularly favored for swimming pools, where their water-resistant structure provides long-lasting performance. The vivid colors of glass mosaics emphasize the clarity and depth of water, creating a unique visual ambiance. Additionally, their glossy finish combined with the natural sparkle of water delivers a mesmerizing effect. The easy-to-clean and hygienic properties of glass mosaics also make them an excellent choice for pools.

Due to their durability, glass mosaics can be used for many years without the need for extensive maintenance, offering a hygienic surface that is resistant to dirt, water, and humidity. This makes them ideal for surfaces in constant contact with water, such as pools, where their resistance to lime and algae buildup simplifies cleaning and maintenance. As a result, pools remain clean and easy to maintain with minimal effort.

Furthermore, glass mosaics are an eco-friendly building material due to their recyclability, making them a sustainable option for modern construction. As a versatile material that complements both modern and traditional styles, glass mosaics provide a visually rich and long-lasting solution for any space.

TECHNICAL DATA SHEETS

MOSSAICA glass mosaics are manufactured by casting molten glass at 950°C into molds. The raw materials are entirely recycled high quality glass. As part of the manufacturing process all mosaics are fully annealed to enhance durability.

Mossaica strives to achieve the highest possible level of environmental stewardship in our manufacturing processes. No pigments containing lead, cadmium or other heavy metals are used in manufacturing our products. No particulate waste is emitted, internal scrap is recycled into new mosaics and process cooling water is reused in a closed loop system.

These glass mosaics are extremely durable and well suited for all wall tile applications, both interior & exterior, and many floor tile applications without risk of deterioration or fading. Our glass mosaics are suitable for use as wall tiles for all interior, exterior and wet area installations (including pools, water features and steam rooms/showers).

Our glass tiles are unaffected by exposure to freezing conditions, including while immersed. For exterior applications additional care should be taken to select the appropriate installation materials and methods;

- can be used as residential or light commercial floor tiles both interior and exterior – or as decorative inserts in any floor installation
- Pool usage: all of our glass mosaics are suitable for use in areas of continuous immersion.

Our glass mosaics are custom made for your order at our factory in Izmir, TURKEY. Production lead times are typically 2 to 3 weeks for orders of standard glass tiles and 4 weeks for custom mosaics and assemblies.

All mosaics and assemblies are available as blends of customer specified colors.

Manufacturing Standard:

Our glass mosaics are made to meet or exceed the requirements of TSE TS-13750 Turkish National Association

Standard Specifications for Glass Tile.

- Chemical Resistance ASTM C650-04; - No Effects Class A
- UV AGING ISO 4892 – No Effects
- Freeze/Thaw ASTM C1026-13; - Passes
- Examination of the surface defects - TS EN ISO 10545-1; - No Defect
- Surface Quality - TS EN ISO 10545-2; - %100 Defect-free
- Water absorption rate*, TS EN ISO 10545-3; Max %0.04
- Rupture strength determination - TS EN ISO 10545-4; 55 N/mm²
- Glazed surface hardness determination - TS EN 101 ; passed;
- Thermal expansion coefficient determination - TSE EN ISO 10545; - PASSED

Recycled Content:

Our glass tiles are made using high quality glass that is 100% recycled. The majority of the glass comes from post-industrial sources, a significant amount of post- consumer glass is consumed enabling.

**Installation:**

Installation instructions are provided with every box of glass mosaics.

Gradation Blends;

Custom gradation blends are offered in all sizes and

Sizes:

Our glass mosaics are offered in 5 standard nominal sizes;

- ☒ 25mm x 25mm x 4 mm
- ☒ 40mm x 40mm x 5.5 mm
- ☒ 50mm x 50mm x 6 mm
- ☒ Herringborn – 23mm x 48mm x 4 mm
- ☒ Hexagon – 40mm x 40mm x 5.5 mm
- ☒ 15mm x 15mm x 5 mm
- ☒ Herringborn (small) – 22mm x 22 mm x4,5mm
- ☒ Herringbone –48,5mm x 39 mm x 6mm
- ☒ Corner – 50mm x 50mm x 6.5 mm

Mounting:

Glass mosaics are provided as mesh-mounted sheets and silicon(polyuretan)-mounted sheets. The default mounting is paper-faced, clear plastic face-mounting is also available. All mosaics are mounted with a 2mm grout joint.

Standard Mosaic Layouts

25mm x 25mm

40mm x 40mm

50mm x 50mm

23mm x 48mm

Hexagon

herringborn 23mm x 48mm

23mm x 48mm

Hexagon

30x30
